# VizieR Online Data Catalog: SWXCS III. Cluster catalog from 2005-2012 Swift data (Liu+, 2015)

The Swift X-ray telescope Cluster Survey. III. Cluster catalog from 2005-2012 archival data. (2015)  
[Go to the original article \(10.1088/0067-0049/216/2/28\)](https://arxiv.org/abs/10.1088/0067-0049/216/2/28)

Keywords : catalogs; cosmology: observations; galaxies: clusters: general; surveys; X-rays: galaxies: clusters

Abstract: We present the Swift X-ray Cluster Survey (SWXCS) catalog obtained using archival data from the X-ray telescope (XRT) on board the Swift satellite acquired from 2005 February to 2012 November, extending the first release of the SWXCS. The catalog provides positions, soft fluxes, and, when possible, optical counterparts for a flux-limited sample of X-ray group and cluster candidates. We consider the fields with Galactic latitude  $|b| > 20^\circ$  to avoid high H I column densities. We discard all of the observations targeted at groups or clusters of galaxies, as well as particular extragalactic fields not suitable to search for faint extended sources. We finally select  $\sim 3000$  useful ...(more)

From the entire Swift XRT archive in the period 2005 February–2012 November, we select all the fields that can be used to build an unbiased, serendipitous X-ray cluster catalog.
