Title	Stellar evolution and pulsation - Galaxy clusters. International School of Astrophysics Francesco Lucchin
Authors	RAIMONDO, Gabriella, PIETRINFERNI, Adriano, CANTIELLO, Michele
Handle	http://hdl.handle.net/20.500.12386/24807
Journal	MEMORIE DELLA SOCIETA ASTRONOMICA ITALIANA
Volume	87

Stellar evolution and pulsation - Galaxy clusters

International School of Astrophysics Francesco Lucchin

Teramo, December 9-13, 2014

editors: G. Raimondo, A. Pietrinferni, M. Cantiello

TABLE OF CONTENTS

<i>Index</i>	325
<i>Foreword</i>	326
<i>List of Participants</i>	329
Stellar Evolution and Pulsation	
S. Cassisi, M. Salaris and A. Pietrinferni <i>Old and new issues in stellar evolution modelling</i>	332
S. Hidalgo, and A. Aparicio <i>The Star Formation History from Resolved Stellar Populations. State of the Art and Future Perspectives.</i>	350
G. Bono <i>Classical Cepheids and RR Lyrae stars: similar, but not too much</i>	358
I. Musella <i>Pulsating stars as distance indicators and stellar population tracers</i>	382
Galaxy Clusters	
J. S. Santos <i>Multi-Wavelength Observations and Surveys of Galaxy Clusters</i>	404
N. Menci <i>Cosmological Models of Galaxy Formation</i>	425
