Verrecchia (SSDC, and INAF/OAR), A. Bulgarelli, N. Parmiggiani (INAF/OAS-Bologna), M. Pilia (INAF/OA-Cagliari), F. Longo (Univ. Trieste and INFN Trieste), report on behalf of the AGILE Team:

In response to the LIGO-Virgo GW event S190412m at $T_0 = 2019-04-12\ 05:30:44.17$ (UT), a preliminary analysis of the AGILE exposure at T_0 shows that the S190412m 90% c.l. localization region was occulted by the Earth.

However, exposure of the field was obtained before and after T_0 . Additional analysis of AGILE data is in progress.
