1.

Equation (16) had a typographic error with the ratios of Γs inverted. The correct equation should read as:

$$M_{\rm mol} = 1.78\ \ S_{\nu_{obs}}[{\rm mJy}]\ \ (1+{\rm z})^{-4.8}\left(\frac{\nu_{850\,\mu{\rm m}}}{\nu_{obs}}\right)^{3.8}({\rm d}_L[{\rm Gpc}\ ])^2 \times \left\{\frac{6.7\times10^{19}}{\alpha_{850}}\right\}\frac{\Gamma_0}{\Gamma_{RJ}}\quad 10^{10}M_\odot.$$

This equation was not used in any of the calculations of $M_{\rm mol}$ in the paper and therefore none of the results are affected. The equation was put in the final version of the paper as an aid for others who would want to calculate masses. We were alerted to the problem by Mihwah Han to whom we are grateful.
